How to Install

How to get this theme installed in your new or existing Wordpress site, using DIVI's existing portability feature.

▶ **Estimated time of installation -** Less than 5 minutes

INSTALL

REQUIREMENTS

Pre-installation checklist

Before installing the theme / template, you need the following items to be installed.

WORDPRESS

The most popular CMS on the net today.

WEB HOSTING

Unless you're deploying on a localhost in your computer, you need a hosting package to get started.

DIVI (LATEST VERSION)

A great and popular theme by Elegant Themes.

Don't have DIVI?

CLICK HERE

D

DIVI PORTABLE
LAYOUT (.JSON)

Import layout to your page

Utilize Divi's portable layout feature and import both layout and images into a new or existing page or post.

1

LOGIN AS ADMIN

Load up your site and log in as admin to start.

2

IMPORT LAYOUT

Goto Divi > Divi Library

Locate your theme's JSON file for the next steps.

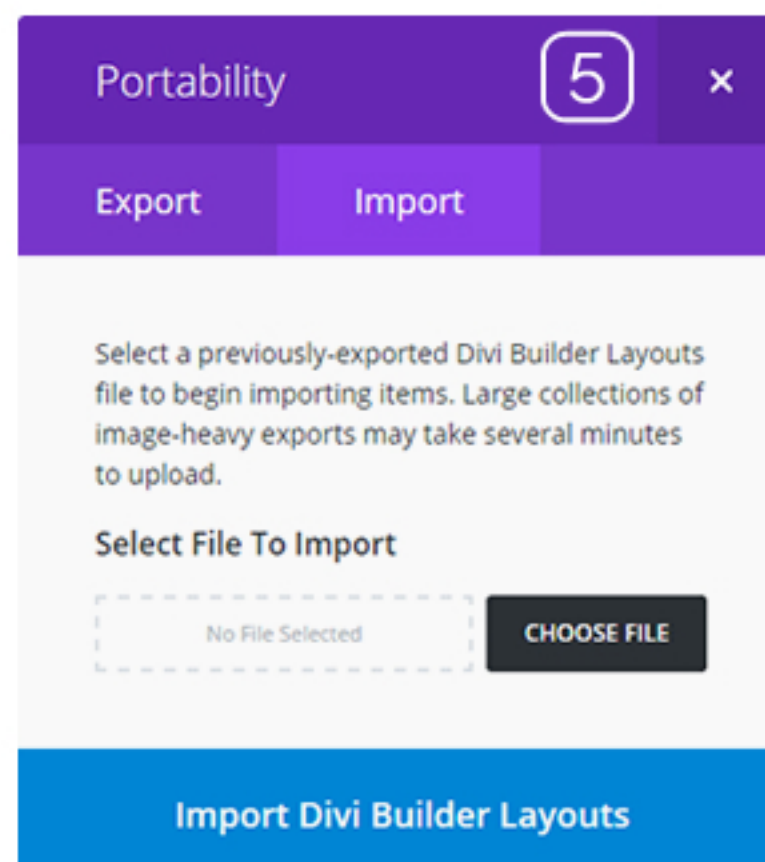

3

IMPORT & EXPORT

Click on the "Import & Export" button at the top of the page.

4

SELECT IMPORT

Click "Choose File" and select the .JSON file.

Click "Import Divi Builder Layouts"

---

5 ×

Portability

Export | Import

Select a previously-exported Divi Builder Layouts file to begin importing items. Large collections of image-heavy exports may take several minutes to upload.

Select File To Import

No File Selected | CHOOSE FILE

Import Divi Builder Layouts

---

6 ×

Portability
